FISH TO

[NEVER]

EAT

DR. MATTHEW ROBERSON

THE DARK SIDE OF FISH OIL

Hi, this is board-certified physician Dr. Matthew Roberson, and if you're eating fish... or even thinking about using fish or krill oil to boost your health... then you're going to want to read every word of this shocking, science-backed health report.

In it you will discover:

- 4 'healthy' fish you should **NEVER**, ever eat
- 6 fish oil "rip-offs" that cause 80% of omega-3s to NEVER be absorbed
- Why taking krill oil alone is robbing your body of omega-3s
- The **ONE** ingredient your fish oil MUST contain or it's practically worthless
- Is your fish oil **toxic?** Uncover the #1 best and worst brands
- Plus a new SCIENTIFIC breakthrough that delivers 5 TIMES more pure health-promoting omega-3 power to your cells than even the best fish oil on the market today

Again, my name is Dr. Matthew Roberson, and as a medical doctor trained at the University of Texas Health Science Center specializing in patient-centered, preventive care and family medicine, it's my sworn duty to apply ALL measures necessary to benefit your health—and that includes letting you know the **uncensored** truth of natural healing breakthroughs like fish oil.

As we begin, it's important to know that throughout this presentation you will see small superscript numbers next to many important points. These represent the mountains of scientific findings and clinical studies behind the information you're about to discover—so you can be assured that what I'm telling you is **factual** and backed by science, not just my opinion.

First though, I want to show you why you need to take **researched-effective** levels of omega-3s every day—especially the healthiest parts of fish oil called **DHA and EPA**. The American Heart Association, the Mayo Clinic, the National Library of Medicine and Web MD all **recommend** you eat fish rich in omega-3s multiple times a week or take high-quality fish oil every day.^{2,3,5,6}

Why? For a stronger heart... ..a sharper mind...smoother skin... **easier** weight management...and better health.

These findings are backed by over **8,000 studies** found at the National Institutes of Health that show omega-3s...

- ✓ **Boost your heart:** *The Journal of Cardiovascular Pharmacology* published studies concluding that taking fish oil exhibits beneficial effects for your heart.⁷
- ✓ **Support Healthy, Clear Skin:** A study published in *Clinics in Dermatology* describes how fish oil helps to keep your skin healthy and moisturized.²⁵ Yet another study shows that fish oil acts as an “internal sunscreen”, enhancing UV protection inside the skin by up to 70%.³¹ All of which is **critical** to fight aging and wrinkles.
- ✓ **Improve your brain:** *Alternative Medicine Review* published studies concluding that taking the beneficial components of fish oil called DHA and EPA helps improve your cognitive brain function.⁸
- ✓ **Ease stiffness:** *Molecular and Cell Biology of Lipids* published a study concluding that omega-3s help your body’s natural inflammatory response.⁹
- ✓ **And support weight loss:** The journal *Food and Function* published a study showing that subjects taking omega-3s **lost 20% more weight** than those who didn’t.²⁶ Additionally, researchers from Gettysburg College found that supplementation with omega-3 fatty acids decreased cortisol levels and **significantly** decreased body fat.³⁰

BUT SADLY, most folks aren’t getting nearly enough **omega-3s** from eating fish or taking typical fish or krill oil supplements and this is why they aren’t experiencing

the positive benefits they desire. Lacking omega-3s can also lead to a dangerous deficiency and imbalance in omega fatty acids.

As a matter of fact, the National Institute of Health recently published a study stating that over **20% of ALL causes of death** in men worldwide may be related to omega-3 deficiencies!³²

You see, another type of omega fatty acid called **omega-6s** are found in processed foods, vegetable oils and are abundant in the American diet.

The ideal ratio of omega-3s to omega-6s in your diet should be 1:1.

But the **typical** American diet has a ratio of up to **1:25** with way too many omega-6s...

Leading to dangerous inflammation in the heart, brain, skin and joints while suppressing your immune system.³³

However, to get the ideal 1:1 omega fatty acid ratio from standard fish oil, along with effective amounts of EPA and DHA, you'd need to take 20 or more large low-quality fish oil capsules each day.

And if you relied on eating fish, you'd have to force down more than **26 cans** of tuna, **4 pounds** of shrimp, **4.5 pounds** of salmon or halibut, or consume **3.7 pounds** of catfish **EVERY SINGLE DAY** of the year. Yuck.

If that's not bad enough, many popular sources of fish are TOXIC and INFLAMMATORY!

For example, farm-raised salmon (like that sold in most grocery stores) has been found to have seven times the **toxic** environmental chemicals called PCBs than wild salmon because the farm-raised salmon are fed pellets made of chicken feces, corn meal, soy and even other fish that contain concentrated toxins.^{10, 34}

No wonder the journal *Science* warns that chemical contaminants in farm-raised salmon are at **unacceptably high levels**.¹¹

And **farmed-raised** tilapia, one of the most consumed fish in America, isn't much better.

According to researchers at Wake Forest University, farmed raised tilapia have very LOW levels of beneficial omega-3 fatty acids and **very HIGH levels** of omega-6 fatty acids.

This imbalance can lead to an **“exaggerated inflammatory response”** that contributes to achy joints, premature aging of your skin, cardiovascular and cognitive decline and difficulty losing weight.¹²

Worse, the U.S. Geological Survey sampled fish in nearly 300 streams across the country and found **mercury** in ALL of them.¹³

If that's not bad enough, *Popular Science* writes: **“Something in the water is feminizing male fish. Are we next?”** Turns out fish found in waters contaminated with chemicals and hormone run-off are actually turning male fish into females.¹⁴ Just imagine what eating these fish could do to you.

And did you know nearly HALF the fish you buy is deliberately **mislabeled and substituted with a total different, cheaper and potentially dangerous fish**, according to Oceana—the world's largest ocean conservation group.¹⁵ The most common fish subjected to this **“food fraud”** are red snapper, wild salmon, grouper, and Atlantic cod so be extra careful when buying these fish.

What's more, Oceana also showed halibut is often actually tilefish, which the federal government warns is high in mercury...and 84% of white tuna used in sushi is actually escolar, a mackerel that contains a naturally occurring toxin, **gempylotoxin**.²⁸ It's a travesty!

And what's the risk if you eat fish riddled with toxins like mercury? The National Resources Defense Council warns that high levels of mercury can cause **memory loss**, tremors, vision loss, numbness to fingers and toes—and even heart problems.

As you now know, eating fish alone isn't the answer, and in some cases may actually be harming your health.

But as you will see in a moment, there is a NEW and BETTER way for you to get omega-3s that are nearly **100% pure and free of environmental contaminants**.

Before that, though, let me **expose** the BIG PROBLEM with most fish oil supplements. Sadly, most people are taking fish oil of such POOR quality it's nearly worthless. And many fish oil **manufacturers** are laughing all the way to the bank!

Here's how they're stealing your money and your health...

Rip-Off No. 1: Fish oil supplements so poorly processed, 80% or more of the omega-3s go UNABSORBED by your body¹⁸

Yes, you heard it right. Less than 20% of the rejuvenating power of omega-3 fatty acids found in many traditional fish oil supplements even make it into your cells, while more than 80% is essentially **WORTHLESS!**

How is this possible?

First, a good portion of the fish oils you find in the store or online are a cheap "ethyl ester" form, a synthetic form that's been shown to be **80% LESS absorbable** than the natural triglyceride (TG) form found in nature.

Unfortunately, some brands of fish oil use the synthetic ethyl ester form since it's so inexpensive to produce. And that puts more money in the pockets of the fish oil manufacturers.

But even with the natural triglyceride (TG) fish oil, many of the omega-3s will be LOST in the digestion process—so your cells will only absorb only a small fraction.

Bottom line—unless your fish oil contains the ONE ingredient I'll share with you in just a moment, you're flushing away up to 80% or more of the omega-3s you paid for!

Rip-Off No. 2: Some fish oil supplements are laden with dangerous toxins

A recent study by Consumer Labs—a leading watchdog of the supplement industry—

revealed that over 30% of 35 leading fish oil contained excess environmental contaminants—including PCBs—and/or false, misleading information and claims on the their labels.²⁰

The Environmental Protection Agency warns that high levels of **PCBs may weaken your immune system**, cause neurological effects and learning deficits...and raise your blood pressure, triglycerides and cholesterol.³⁵

Rip-Off No. 3: Use of “fake” omega-3s

Some manufacturers use omega-3s which are far less beneficial to your health, most notably plant-sourced omega-3s that contain **Alpha Linolenic Acid** referred to as ALA, and **NOT** the vital, health-enhancing omega-3s EPA and DHA.

While the label may say “omega-3s,” know that only a **small percentage** of plant-based ALA gets converted to healthy EPA and DHA because your body lacks the **sufficient** amounts of the proper enzymes to do so. The Linus Pauling Institute at Oregon State University reports that in healthy young men, just 8% of dietary ALA is converted to EPA and only 0.4% is converted to DHA.²¹

This means that you would have to take over 200 capsules of an ALA product daily to get the effective health promoting dose of DHA.

And don't think you can get your omega-3s from vegetable oils either. They typically contain mostly omega-6 fats, that can actually counter the outstanding health effects of omega-3s.

Rip-Off No. 4: Krill and fish oil supplements that contain far less of the omega-3s than claimed on the labels

Another trick used by some fish oil manufacturers is shortchanging you on the actual amount of omega-3s found in each serving.

A comprehensive study by the Department of Agriculture and Food Science reports that more than HALF of fish oil products on the market do NOT contain the amount of critical DHA or EPA stated on the label.³⁶ In other words, **you're paying for** something that's

not even in the bottle.

And that's not all...

Rip-Off No. 5: Krill and fish oil supplements that are intentionally under-dosed.

Unfortunately, if you review labels, nearly all traditional fish oil products are **secretly** under-dosed, providing only a couple hundred milligrams of EPA and DHA per serving... while scientific studies show 10 times this amount—more than 2,000 mg per serving—is needed for you to see significant health benefits. But **unethical** fish oil brands are literally banking on the fact that most unsuspecting consumers won't know the facts.

What's more, almost all fish oil products contain much more EPA than DHA, while research shows higher levels of DHA yield the greatest health benefits, particularly with regard to heart health, brain health, anti-aging properties, and even fat loss.^{24,29}

Rip Off No. 6: Krill and fish oil supplements that go rancid before you use them

Traditional fish oil products can quickly turn rancid and spoil—**causing** “fish burps” and other digestive issues—if the products were not formulated adequately, not handled properly during manufacturing or if they were stored in unsuitable conditions, such as excessive temperatures or inadequate packaging.

When you consider all of the shocking facts about toxins in popular fish being eaten today, not to mention the six fish oil rip-offs I've just **uncovered**, you can see that the way most people are attempting to get their omega-3s is **DEAD WRONG**.

That's why I want to introduce you to a **one-of-a-kind** natural, breakthrough formula that overcomes ALL of these problems. It's really two products in one and it represents the next generation of fish oil for ultimate omega-3 purity, potency and performance.

It's name is *OmegaKrill 5X™*. Why 5X? Because it has 5 times better absorption for starters.

What's more, it's by far my #1 choice for quality omega-3s. In fact, as a medical doctor I was so impressed with this product purity, and the **results** I personally achieved with it, that I proudly became a medical consultant for BioTrust Nutrition (the respected company that produces this premium, cutting-edge fish oil blend) and asked that I have the privilege to share the news about *OmegaKrill 5X* to men and women in need all around the globe.

Moving forward, as the name suggests, *OmegaKrill 5X* is a **combination** of a highly concentrated EPA/DHA fish oil along with a healthy dose of krill oil from the pure, cold waters of the Antarctic; both wild harvested in a certified sustainable manner.

So you may be wondering, **“Why both fish oil AND krill oil in one product?”** We will get to that important point in a moment, but first it's critical to know that...

OmegaKrill 5X has received the coveted **“5-Star Rating”** from the International Fish Oil Standards Program (IFOS). IFOS is the only independent third party evaluator of fish oil supplements in the world—and more than 99% of all the fish oil supplements on the market do NOT possess this prestigious rating.

IFOS tests fish oil using the **highest**, most stringent standards for omega-3 content, contaminants, and freshness—standards that exceed those set by the Council for Responsible Nutrition, the World Health Organization and even the Global Organization for EPA and DHA.

An IFOS Consumer Report recently verified the top rating of *OmegaKrill 5X* by noting, “*OmegaKrill 5X* receives a FIVE out of FIVE Star IFOS rating based on the following criteria

1. Omega-3 Concentration Consistent with Label—YES
2. Passes IFOS Oxidation standards—YES
3. Passes IFOS PCB contaminant standards—**YES**
4. Passes IFOS Heavy Metal standards—YES
5. Passes all IFOS testing categories—YES

Only products that have achieved the highest worldwide standards for fish oil will be awarded the IFOS “5-Star Rating.” That said, there are many, many more reasons that *OmegaKrill 5X* stands head and shoulders above other fish oil supplements on the market today, starting with its **superior** absorption:

For starters, we use the superior, natural TG form of fish oil, not the lower quality, lesser-absorbed ethyl ester form we talked about previously.

But we didn’t stop there. *OmegaKrill 5X* uses a new **patented** natural technology called **VesiSorb®** that naturally INCREASES the amount of omega-3s your body absorbs by more than 15 times the inferior ethyl ester form and 5 times over even the preferred TG form!

In other words, with OmegaKrill 5X you’re getting five times more omega-3 power than even the best TG form fish oil products on the market.

In fact, in one pilot study, regular fish oil was compared to fish oil enhanced with the VesiSorb® delivery system. People taking fish oil with VesiSorb® **saw an increase of 567% in peak blood levels of EPA.** This means they got over five times MORE omega-3 EPA in their blood with VesiSorb® than with typical fish oil.²²

What’s more, typical fish oil droplets are large—too large to be effectively absorbed in your intestines.

But VesiSorb® technology creates its own micro-droplets, with each healthy omega-3 molecule protected in the middle. This allows these much smaller droplets to survive the digestive process in your acidic stomach altogether and be delivered fully intact.

The result? Nearly 100% of the omega-3s you ingest when you take *OmegaKrill 5X* are delivered to your brain, **heart**, joints, skin and fat-burning hormones where they can begin to work their magic.

With *OmegaKrill 5X* and VesiSorb® technology, you get a **clinically-proven**, significantly-increased absorption of omega-3s that’s 15 TIMES greater than traditional “ethyl ester” fish oil and 5 TIMES greater than triglyceride fish oil supplements.

The proof?

Look at these photos of a standard fish oil capsule poured into a cup of water. Notice how the fish oil droplets just sit on top of the water and do NOT dissolve or get absorbed. Same thing happens when you take typical fish oil supplements. Most of the healthy omega-3s do NOT get absorbed, while the toxins found within them DO get absorbed!

Below is a popular Omega-3 fish oil compared to the same fish oil in VESIsorb®:

Simply put, if your fish oil product does not contain VesiSorb® on its list of ingredients, you're throwing 80% or more of the omega-3s in the trash, even if it's triglyceride (TG) fish oil!

And besides that, **remember**, unabsorbed omega-3s are totally WORTHLESS and provide ZERO health benefits.

And with OmegaKrill 5X you also get...

A new patented process called **Super Critical CO2 Extraction** that delivers fish oil of

the highest purity standards, avoiding the contaminant and toxicity issues found in many fish oil products today.

How? With the *Super Critical CO2 Extraction* process, **no toxins**, heavy metals or hydrocarbon materials come in contact with the extracted oils—making it a “non-toxic” extraction method.

Compare that to typical fish oil extraction methods, many of which use unhealthy chemical solvents such as propane, butane, hexane and pentane to isolate the oils.

In addition, *Super Critical CO2 Extraction* uses much lower temperatures, which **protects and preserves** the natural state of these delicate omega-3 oils—and keeps them fresher than typical fish oil that are destroyed by typical high heat-processing.²³

Even better, *Super Critical CO2 Extraction* allows for super concentrated levels of EPA and DHA per capsule. This means you take far fewer and smaller-sized capsules while reaping the same benefits—saving you time, money and plenty of hassle.

While certainly not cheap, this new CO2 Extraction technology also makes it possible for you to get much higher DHA levels than what’s found in traditional fish oil products.

And remember, **research** clearly shows that DHA is the King of omega-3s.^{24,29}

But we didn’t stop there...

We added wild harvested and certified sustainable krill oil harvested in the cold, pure waters of the Antarctic. Why? Because Krill contains 40 times more antioxidant power than fish oil through the extremely potent antioxidant, **astaxanthin**, that is inherent to krill. This is important because this antioxidant keeps the omega-3s in *OmegaKrill 5X* fresh and prevents it from going rancid, not to mention squelching age-accelerating free radicals in your skin, brain, heart and joints.

Yet, remember, you can’t rely on krill oil alone for your omega-3s because it contains much LOWER levels of EPA and DHA compared to fish oil. So if you’re taking krill oil by itself, it’s not enough.

OmegaKrill 5X also includes...

A special encapsulation process that prevent fish burps and aftertaste

One of the things that really bother me about traditional fish oil supplements is burping up a fishy aftertaste—and maybe you hate that, too.

But this is no problem with *OmegaKrill 5X*. Because **VesiSorb®** technology encloses and protects the omega-3 oils during the digestion in your stomach, fish burps are not only unlikely—they're virtually **impossible** with *OmegaKrill 5X*!

Plus, *OmegaKrill 5X* is made with natural ingredients and contains NO sugar and NO artificial sweeteners, flavors, colors or preservatives. It does not contain any ingredients from dairy, wheat, egg, tree nuts, or peanuts. What's more, *OmegaKrill 5X* is made with gluten-free and non-GMO ingredients. It really is the best of the best.

And if that's not enough, *OmegaKrill 5X* gives you...

Super concentrated omega-3s in smaller, easier to swallow soft gels

Time after time, people have told me they hate taking fish oil because the capsules are too big and too hard to swallow. Who's to blame them? No one wants to choke down horse-pills every day.

But the new technology used to formulate *OmegaKrill 5X* packs all the power of 20 large standard fish oil capsules into much **smaller, easy-to-swallow soft gels that are 1/3 the size**. Simply take 3 small softgels each day, with or without food.

Sounds pretty impressive, doesn't it?

But you don't have to take my word as to why *OmegaKrill 5X* is so powerfully effective... just **listen** to this unsolicited feedback from other good folks just like you about what *OmegaKrill 5X* for them:

Darryl Lee says, “**I FEEL 20 YEARS YOUNGER!** I took my family skiing in the Canadian Rockies. I never would have been able to do this if I didn’t take the *OmegaKrill 5X*. My girlfriend says I look, act, and feel younger.”

David Self says this formula is “**IMPRESSIVE—CERTAINLY NO FISH BURPS!** I’m very impressed with *OmegaKrill 5X* and the science behind it. What’s most impressive to me about it is the **QUALITY** of the ingredients. That’s what I care about, and it’s the #1 reason I share it with clients and friends.”

Robin Rickey exclaims, “***OmegaKrill 5X HAS DONE WONDERS FOR ME.*** My skin and complexion are radiant, and my hair is healthy and shiny. I have tried other fish oil supplements and didn’t see the results I’m experiencing now.”

Jo-Ellyn Couture loves this formula because it gives her “**MORE ENERGY!** I do feel better, sleep better and have more energy to walk for exercise.”

And Trent Froude calls *OmegaKrill 5X* the “**BEST FISH OIL EVER USED!** I have been able to sleep better, my focus has been better, and I lost 4 extra pounds of fat. Not something I experienced with any other product.”

What can you expect when you take *OmegaKrill 5X*? Plenty of great things!

Omega-3s are essential for supporting healthy, hydrated skin. So **you will notice** your skin will start looking smoother, younger, more vibrant—and so will others.^{25, 31}

High levels of DHA are vital to support brain health—and that can mean clearer, sharper thinking and **less forgetfulness**.⁸

You will feel rejuvenated and have energy like you had years ago, as the superior omega-3s power up and supports a healthy heart.⁷

Is weight loss a struggle? With *OmegaKrill 5X*’s™ superior absorption you’ll likely find it easier to lose those stubborn pounds.³⁰

Bottom line. *OmegaKrill 5X* has been specially formulated and developed to unleash the FULL POWER of omega-3 and help you become healthier while looking and feeling younger.

Now at this point, you're probably wondering how you can obtain *OmegaKrill 5X* for you and your loved ones, along with the price for such a breakthrough, quality formula... both great questions.

Again, *OmegaKrill 5X* was developed by BioTrust Nutrition, a pioneering company with over 2 million products shipped worldwide. BioTrust is committed to the **quality, potency and purity** of their products and they make customer service a priority as demonstrated by their A-rating with the Better Business Bureau.

Additionally, BioTrust is dedicated to giving back by feeding a hungry child for every order received and they have helped to grant the wishes of more than 100 children with life threatening medical conditions through their alliance with The Make-A-Wish Foundation®.

As for *OmegaKrill 5X*, it's 5-Star Rating from IFOS signifies it uses only the finest, purest, **wild-harvested** fish and krill oils in the world, along with honest levels of omega-3 fatty acids. This also makes it one of the most expensive fish oil products to produce when you consider the combined cost of patented VesiSorb® Maximum Absorption Technology, Super Critical CO2 Extraction, pharmaceutical grade manufacturing, and the additional voluntary expense of independent 3rd party quality assurance testing.

Fact is, the cost to produce *OmegaKrill 5X* is 400% to 500% higher than many low quality, ineffective fish oil supplements available on the market today. But fortunately, BioTrust is willing to make *OmegaKrill 5X* available to you today at a significant discount, and you'll see why in just a moment.

Beyond that, BioTrust takes things a step further by backing each bottle of *OmegaKrill 5X* with an unheard of **1-YEAR Unconditional Money-Back Guarantee**.

I want you to do me a favor. Think about all the money you've spent, and all the valuable time and resources you've wasted over the years, on krill and fish oil supplements that may have been rancid, causing further harm to your body, organs and overall health...

Now, let me ask you a question, how much would a healthy heart and brain, along with healthy joints, skin and optimal fat burning for life be worth to you?

\$1000?

\$500?

Heck, I'm sure the amount you've already spent to boost your health, including the money you've used on ineffective products, goes above and beyond those figures several times over...and with little or no positive results to show for it...

But fortunately, obtaining access to this true omega-3 breakthrough isn't going to cost you \$1000 or \$500. In fact, it's not \$400, \$300 or even \$200, although I'm sure you'd agree that supercharging your health with the **true power** of scientifically effective levels of pure and potent omega-3s daily would be completely worth that price...

Instead, the price you will invest today for a 30-day supply of *OmegaKrill 5X* is just \$97...

But you know what? I want to make this even better for you... To reward you for watching this entire video, and because BioTrust wants to EARN your business and get this amazing product in your hands, when you order right now, you're going to be rewarded with a 30-day supply of *OmegaKrill 5X* for **just \$49**.

And here's the best part. When you choose to invest in our most popular 90-day supply package or our "best deal" 180-day supply package, you're going to get additional, sizable discounts on top of today's already reduced prices.

To put this offer into perspective, you would need to take at least 20, huge low-quality fish oil capsules each day, along with separate krill oil, and spend nearly \$400 a month to get the same benefits delivered in each affordable bottle of *OmegaKrill 5X*—and that still wouldn't save you from all the purity and mislabeling issues so problematic in fish oil supplements today...

That said, we are only able to **guarantee** these special discounted prices until our current inventory runs out, as the price of the premium raw ingredients contained in

OmegaKrill 5X —including the patented VesiSorb® technology—is constantly changing due to supply and demand, causing the pricing to be stringently re-evaluated with each subsequent production run—another reason why stocking up today is a smart option...

And by the way, that's not marketing hype—just the cold, hard, honest truth.

Furthermore, to protect you from fake knock-offs and to offer you the lowest possible price (by cutting out all the middlemen), know that the **ONLY** place you can buy real *OmegaKrill 5X* in the world is direct through BioTrust, right here on this website.

Beyond that, because *OmegaKrill 5X* is not available through any third-party website or retail store, this also ensures you will be taken care of directly by our premium in-house customer care team right here in North America (and not an outsourced, overseas third-party). In fact, our **world-class** level of service is known to stand head and shoulders above the rest of the industry – a big reason why BioTrust has been awarded an “A” rating with the Better Business Bureau as we mentioned previously.

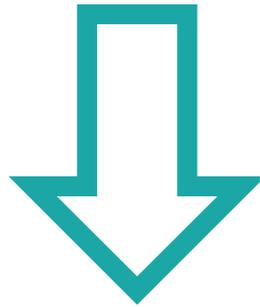

Now, here's exactly what to do:

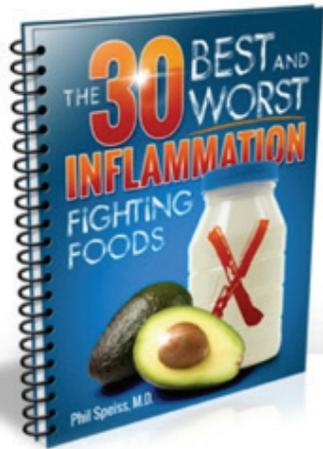

For fastest service, simply choose your money-saving package below this video and then click the yellow “Add to Cart” button to reserve your discounted order of *OmegaKrill 5X* and proceed to our secure order page. And don't worry...your order information is 100% safe and secure...BioTrust uses the same online security system as the most trusted companies online...

And even better, when you choose to invest in *OmegaKrill 5X* today, you will also have access to a **FREE** downloadable copy of a must-read consumer report, *The 30 BEST and WORST Inflammation Fighting Foods.* It gives you the inside scoop on popular foods you should avoid at all costs because they trigger inflammation—including information on the **BEST** and **WORST** cooking oils for your heart, brain and skin—and the best inflammation-reducing foods to eat, to further enhance the results you'll get from your use of *OmegaKrill 5X*. This valuable report is valued at \$29.95, but it's yours with your purchase today **FREE** at no additional cost.

And as if that wasn't enough, you will also receive VIP access to BioTrust's online support community and FREE unlimited email support from your very own health & nutrition coach to make certain every aspect of your health transformation is fully supported...just one more way you're assured of success with BioTrust's industry leading customer service team...

So here we are...you're now standing at a fork in the road, staring down two possible paths.

On one side is a road that leads to more disappointment, frustration and further health risks with typical omega-3 products that FAIL to deliver all the rejuvenating power of omega-3s or are contaminated with toxins that can make your health problems worse, not better.

As you travel this road, you may wonder why taking fistfuls of typical fish oil or omega-3 products aren't helping you feel stronger, think clearer, move easier or feel younger.

But it doesn't have to be that way for you. You see, there is that other road. A road where you are in total control of your body, your health and your future.

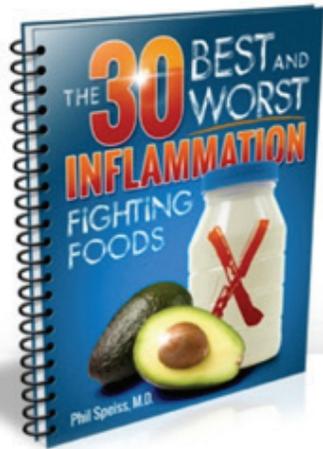

On this road, your health is restored and enhanced...your life is full of vigor, free of discomfort and distress...and overflowing with energy—energy to spend enjoying your family, your children and your most cherished relationships..

As a medical doctor who has dedicated my life to helping others, it's my genuine hope that this path is the direction you choose and experience—and I know it's the path that you also desire for yourself.

So now's your chance, your one opportunity to get started today where you're back in the driver's seat, taking full control of your health, your body and your life...

I speak for the entire BioTrust team when I say that we couldn't be more excited to work with you and help you along the new path that you are choosing today...We're incredibly proud of you, and we want you to know that we'll be here for you, with you, every step of the way.

So make it a great day...Select your money-saving package below and then click on the Add to Cart button to secure your discounted price for BioTrust's *OmegaKrill 5X* and get started toward your new future, right now...

FREQUENTLY ASKED QUESTIONS

Q: How many bottles should I order?

With research suggesting that Omega-3 supplementation is even more important to your health than taking a daily multi-vitamin, and the fact that an imbalanced Omega-3 to Omega-6 ratio, and the Toxic Inflammation Overload it causes, have been linked to so many devastating health concerns, we truly believe EVERYONE should be taking a pure, potent, highly absorbable Omega-3 fatty acid supplement daily, ongoing, to continually fight against the omega-unbalancing food and environmental factors that we are constantly exposed to every single day.

With that said, it is best to stock up and **save more** today with our special three- and six-bottle discounted packages in order to restore and maintain a Healthy Omega Balance while avoiding the negative consequences associated with Toxic Inflammation Overload.

You can always return even empty bottles for a full refund for up to 1 YEAR if you later decide OmegaKrill 5X isn't right for you. Additionally, these packages allow you to take advantage of our lowest possible prices today, without the worry of increasing prices and/or additional shipping fees later.

Q: What specifically makes OmegaKrill 5X the best omega-3 fatty acid supplement in the industry?

Simply put, through patented VESIsorb® Maximum Absorption Technology and Super Critical CO2 Extraction, OmegaKrill 5X is able to deliver up to 5 times more Omega-3 fatty acids to the cells of your body than even TG form fish oil, and 15 times more than ethyl ester fish oil supplements, where up to 80% of the most critical active ingredients will never be absorbed.

Beyond that, with the calculated addition of a 1 to 6 ratio of EPA to DHA to give you 50 times more delivered to the body than DHA than traditional fish oil products, AND the strategic inclusion of krill oil for its powerful astaxanthin antioxidant properties, there really is no comparison... OmegaKrill 5X is easily the #1 Omega-3 supplement on the market.

Still, in addition to that, OmegaKrill 5X:

1. Provides the Scientific Level™ of omega-3 fatty acids daily (most traditional products barely contain 1/10th of the true Scientific Level)
2. Is sustainably-sourced from cleanest ocean waters in the world, ensuring environmental responsibility in addition to its top-rated purity
3. Is the only product to contain a quadruple layer of protection against rancidity (low-temperature processed, opaque capsules to protect from light, encased by the protective VESIsorb matrix, and fortified with potent astaxanthin antioxidants)
4. Is comprised exclusively of pharmaceutical grade oils and is produced in the most advanced pharmaceutical facility in the world
5. Is made with natural ingredients and has no artificial sweeteners, flavors, colors or preservatives added
6. Leaves NO chance for fish burps as VESIsorb allows the oils to bypass digestion in the stomach
7. Is backed by 3rd-party quality assurance testing and an unheard of 1-YEAR Unconditional Money-back Guarantee

Q: How do I use this product?

Simply take 3 small capsules daily, with or without food.

Q: Is it ok to take this supplement long term?

Yes, absolutely, and that is what is recommended. As mentioned, omega-3 fatty acids play a vital role in cardiovascular health, nervous system function, brain development, immune system function, cell structure, body composition, and metabolism. We truly believe that EVERYONE should be taking an omega-3 supplement daily, ongoing, to continually fight against inflammation, optimize body composition, and support optimal

overall health and vitality.

Q: Does this product contain caffeine or any other stimulants?

No. OmegaKrill 5X is completely caffeine- and stimulant-free.

Q: Are there any allergy concerns with this product?

Like every BioTrust product, OmegaKrill 5X is made with natural ingredients and at the Scientific Level™ needed to be effective. OmegaKrill 5X contains Fish (Anchovy, Sardine), Crustacean shellfish (Krill), and soy. This product is manufactured in a facility that also processes milk, egg, tree nuts, peanuts and wheat. Independent laboratory testing ensures potency and purity. GMP quality assured. No sugar, artificial sweeteners, flavors, colors or preservatives added. It's also Gluten-Free and non-GMO. If you have any concerns, you should consult your physician prior to taking any supplement.

Q: If I have a medical condition, can I take this product?

OmegaKrill 5X is an all-natural formula that is considered safe and extremely effective for nearly everyone. However, if you take prescription medications or have a medical condition, we recommend that you show a bottle of OmegaKrill 5X to your physician and/or pharmacist for proper approval. You can always return it later with our industry best 1 YEAR Money Back Guarantee.

Q: How will this product be shipped to me and how quickly?

We will ship your order directly to your home or office using USPS, and you will have it within 5 to 7 business days. Rush shipping is available.

Q: Will anything else be sent to me, or billed to me, after I order?

No. This is NOT an auto-ship program. You only get shipped what you order today and nothing more.

Q: Is it safe to order online from your web site?

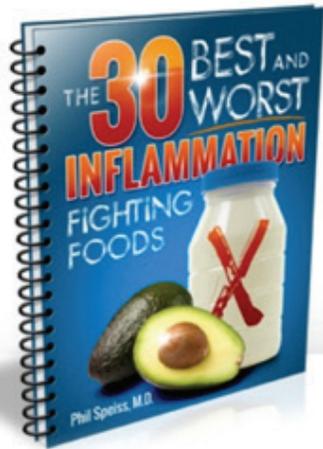

Yes. We use a 256-bit secure ordering server so you are protected the same as if you were ordering from Amazon.com or any other trusted Web site.

Q: How long will the sale last?

We are unable to guarantee today's pricing beyond today. Our pricing often fluctuates due to the constantly changing prices of the high-quality, pharmaceutical grade ingredients used in OmegaKrill 5X, along with the varying cost of patented manufacturing and the VESIsorb® delivery enhancement system. To guarantee our lowest pricing, be sure to secure your order today.

Q: What if this product doesn't work for me?

While OmegaKrill 5X was created to work, if for any reason at all you are unsatisfied with your purchase, just let us know and we will issue a prompt and courteous refund even on empty bottles. You're always protected by our industry best 1 YEAR Money Back Guarantee.
